# Journey to Proficiency Scales

- Worked on proficiency scales in the past
- Met with Dr. Bob Marzano – expert in proficiency scales
- Purchased proficiency scales
- Curriculum coordinators cross-walked critical concepts with Missouri Learning Standards

# Proficiency Scale: 3rd Grade Math

## Title of Scale: Equivalent Fractions

**Elementary: Math**  
**Grade: 3rd Grade**

**Standard(s):**

[NE.A.4](#) Demonstrate that two fractions are equivalent if they are the same size or the same point on a number line.

[NE.A.5](#) Recognize and generate equivalent fractions using visual models, and justify why the fractions are equivalent.

\*[NE.A.6](#) Compare two fractions with the same numerator or denominator using the symbols  $>$ ,  $=$  or  $<$ , and justify the solution.

\*[NE.A.7](#) Explain why fraction comparisons are only valid when the two fractions refer to the same whole.

4.0	Students will be able to: <ul style="list-style-type: none"><li>Compare fractions with different numerators and denominators by reasoning about their relationship to whole numbers or simple benchmark fractions (for example, determine that <math>5/4 &gt; 7/8</math> because <math>5/4</math> is greater than <math>4/4</math> or 1 and <math>7/8</math> is less than <math>8/8</math> or 1).</li></ul>
3.0	Students will be able to: <ul style="list-style-type: none"><li>Identify fractions equivalent to whole numbers (for example, when given the fractions <math>1/1</math>, <math>1/2</math>, <math>3/4</math>, <math>6/6</math>, <math>7/3</math>, and <math>8/4</math>, identify which fractions are equivalent to whole numbers and represent them on a number line). <b>(EF1)</b></li><li>Identify simple equivalent fractions by reasoning about their size or location on a number line (for example, when given the fractions <math>1/2</math>, <math>2/4</math>, <math>2/1</math>, <math>2/3</math>, and <math>4/6</math> which all refer to the same whole, identify which fractions are equivalent to each other by reasoning about their size or by locating them on a number line). <b>(EF2)</b></li><li>Compare fractions with the same numerator or same denominator by reasoning about their size (for example, compare <math>1/4</math> and <math>1/6</math>, <math>2/3</math> and <math>2/4</math>, <math>3/8</math> and <math>5/8</math>, and <math>4/4</math> and <math>5/4</math> using <math>&lt;</math> and <math>&gt;</math> symbols by reasoning about the relative sizes of their numerators and denominators). <b>(EF3)</b></li></ul>
2.0	<b>EF1</b> Students will <i>recognize</i> and <i>recall</i> specific vocabulary, including: <ul style="list-style-type: none"><li>Denominator, equal portions, equivalent, fraction, number line, numerator, whole, whole number</li></ul> Students will be able to: <ul style="list-style-type: none"><li>Represent a given fraction using a model or diagram.</li><li>Locate a given fraction on a number line.</li><li>Explain that selecting a number of equal portions of a whole, in which the number of portions selected is equal to the number of portions into which the whole has been partitioned, is the same as selecting the entire whole. For example, explain that the fraction <math>4/4</math>, which indicates 4 portions of a whole that</li></ul>
