

How to Connect MetroSMART Hot Spot

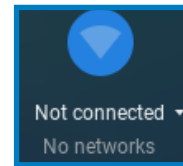

1 Ensure your computer and Hot Spot are turned **on**.

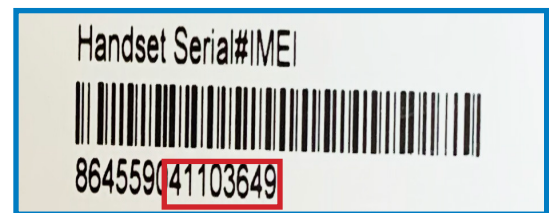

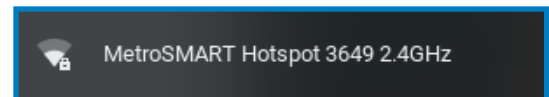

2 Locate the Wi-Fi icon. This will be located in the **bottom right hand corner** of your screen.

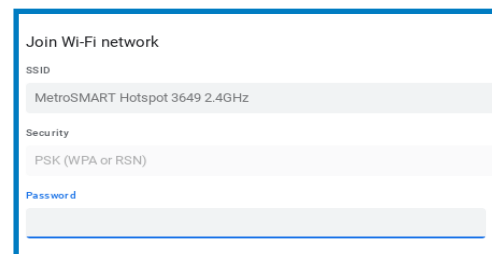

3 Once selected, click the **drop down arrow** beside the Wi-Fi name and select your Hot Spot. The Hot Spot name will begin with **MetroSMART**.

4 Locate your **Wi-Fi password**. This is located on the side of your Hot Spot box. Under "Handset Serial#IMEI" is a barcode and a 15 digit number. Your password will be **the last 8 digits of this number**.

5 Enter your password into the **password field** on your device.

A screenshot of a mobile device's "Join Wi-Fi network" screen. It shows fields for "SSID" (filled with "MetroSMART Hotspot 3649 2.4GHz"), "Security" (filled with "PSK (WPA or RSN)"), and "Password" (empty).

6 You will know your device is **connected** when the Wi-Fi bars are filled.

Contact the Help Desk at **418-HELP (4357)** if you have any questions.
