Parent Information for Odysseyware 2020

Odysseyware is the program your student is using during Summer School. This program houses all the high school courses.

Odysseyware helpdesk contact number-1-877-251-666

Your student's username and password are the same as the ones they use to log into technology at their KCPS school. The capitals in the username and password must be typed as capital letters.

Type the URL address for Odysseyware in the address bar. NOT THE SEARCH BAR

https://kansascityps.owschools.com

The student should view the tutorial when they log in. They can access the tutorial again if they need it later. This will show them how to navigate the lessons. They can also click on the FAQ tab in Odysseyware for addition help.

If the Pretest has a grey arrow above a question number the student can skip that question. If they open the question up it will not let you type in the answer box. If the background is grey continue with the next question. This is also true for tests and quizzes.

Students must turn in their assignments at the bottom of their screen. They will be prompted to turn these assignments in for grading.

Students can message their teachers through the Odysseyware system or the classroom.
